Sri Lanka · open to remote

PROFILE

IT undergraduate at SLIIT specialising in Artificial Intelligence, building intelligent full-stack products end to end — from machine-learning prediction models to production-ready interfaces. Practical, product-minded and comfortable owning a feature from database schema to deploy.

EDUCATION

BSc (Hons) in Information Technology — Artificial Intelligence

Sri Lanka Institute of Information Technology (SLIIT) · 2024 – Present

Coursework: machine learning, neural networks, data structures & algorithms, database systems, software engineering, full-stack development.

Machine Learning | Data Structures | AI Algorithms | Database Systems

PROJECTS

Kasala.Lk — ML-powered waste collection platform

Python · FastAPI · Next.js · Supabase · Scikit-learn

- Predicts garbage-collection demand per city so councils can allocate trucks and routes by forecast instead of fixed schedules.
- Citizen-facing portal for reporting missed collections, feeding live data back into the model.
- Built the ML pipeline, REST API and responsive dashboard end to end.

AI Study Companion

Python · LangChain · React · (in progress)

- Turns lecture notes and PDFs into summaries, flashcards and quizzes using a retrieval-augmented LLM pipeline.

Smart Attendance — face-recognition system

OpenCV · Flask · MySQL

- Real-time attendance capture with a lecturer dashboard, removing manual roll call.

TECHNICAL SKILLS

AI / ML	Python, Scikit-learn, Pandas, NumPy, TensorFlow basics, prompt & LLM integration
Frontend	HTML5, CSS3, JavaScript (ES6+), React, Next.js, responsive & accessible UI
Backend	Node.js, Express, FastAPI, Flask, REST APIs, authentication
Data	MySQL, PostgreSQL, Supabase, Firebase
Tools	Git & GitHub, VS Code, Postman, Vercel, Figma
Creative	Premiere Pro, After Effects, Photoshop, technical content creation

HIGHLIGHTS

SLIIT Buildathon 2026 — participant | 12+ personal & academic projects shipped | Tech content creator — 3 platforms
